CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the May/June 2013 series

0620 CHEMISTRY

0620/22

Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

6 (a) zinc → magnesium → calcium → rubidium

1 mark for 1 pair reversed **ALLOW:** all reversed for 1 mark

REJECT: if mention of atoms/ molecules

| (b) | zinc/ iron | [1] | |
|-----|--|-----|--|
| | REJECT: if K / Na / A1 included = 0 marks | | |

| (c) (ı) | 2 electrons in outer shell | [1] |
|---------|--|-----|
| | 8 electrons in middle shell ALLOW: 2,8,2 in numbers for 2 marks | [1] |

| (ii) | 14 | [1] |
|------|----|-----|
| | | |

| 7 | (a) ions can move / ions are mobile | [1] |
|---|-------------------------------------|-----|
| | IGNORE: it has an ionic structure | |

| (b) it is a molecular structure / it has no ions | [1] |
|--|-----|
| IGNORE: electrons can't move | |

| (c) | add water and shake / stir / mix | [1] |
|-----|----------------------------------|-----|
| | | |

| filter | [1] |
|--------|-----|
|--------|-----|

| [1] |
|-----|
| |

| (ii) graphite | [1] | |
|---------------|-----|--|
| (ii) graphite | [1] | |

| (iii) | negative electrode: zinc / Zn | [1 | 1] |
|-------|-------------------------------|----|----|
| | | | |

| positive electrode: chlorine / Cl_2 | [1] |
|---------------------------------------|-----|
| IGNORE: C1 | |

REJECT: Chloride / Ct

| (iv) acidify / add nitric acid | [1] |
|--------------------------------|-----|
|--------------------------------|-----|

REJECT: add sulfuric acid / add hydrochloric acid

add (aqueous) silver nitrate [1]

white precipitate [1]

3rd marking point dependent on correct reagent (silver nitrate)

[Total: 11]

[Total: 6]

| Page 6 | Mark Scheme | Syllabus | 2 |
|--------|-----------------------|----------|-----|
| | IGCSE – May/June 2013 | 0620 | No. |

8 (a) Any four of:

- sugar dissolves
- sugar particles become separated or water molecules get in between sugar particles
- diffusion
- movement of <u>particles</u> (in solution)
- random (movement)
- (sugar) particles constantly collide with (water) molecules
- particles (in solution) spread out / seperate
- ALLOW: particles move from concentrated to dilute (sugar) solution

| b) (i) | 3 | [1] |
|--------|---|-----|
| (ii) | 12 | [1] |
| (iii) | any OH group ringed / all OH groups ringed | [1] |
| (iv) | carbon dioxide IGNORE: CO ₂ | [1] |
| (v) | yeast | [1] |
| | no <u>air</u> / <u>oxygen</u> present IGNORE: reference to temperatures between 5–45 °C | [1] |
| (vi) | solvent / fuel / making a named chemical e.g. making ethanoic acid and estern antiseptic / medical wipes / cleaning fluid / vodka sauce / paints/ disinfectal preservatives IGNORE: unqualified uses e.g. in cars / food / cooking | |

[Total: 11]
